SilveX Materials INC

SilveX Materials

SilveX Materials INC

SilveX Materials Inc operates on a factory-direct export model, supplying interior doors directly from our manufacturing partners to our U.S.-based warehouse.

By eliminating unnecessary middlemen, we are able to offer more competitive pricing, while maintaining consistent quality, reliable inventory, and fast local delivery.

Our “Factory Direct Export + U.S. Local Warehouse” structure allows customers to enjoy the cost benefits of direct sourcing without the risks and delays of overseas procurement. This model is especially valuable in today’s market, where rising costs and supply instability are common challenges.

SilveX is built for dealers, distributors, and contractors who value price transparency, stable supply, and long-term partnership.

At SilveX Materials Inc,
we don’t just sell doors — we deliver a sustainable factory-direct pricing advantage.

Particle Board

SHAKER DOOR

SD-01

SilveX's classic shaker doors are built with stiles and rails with solid particle board, which make the structure pretty stable. The MDF panels thickness ranges from 8mm to 25mm which allow them to be used as both interior doors and apartments entry doors.

POCKET DOOR

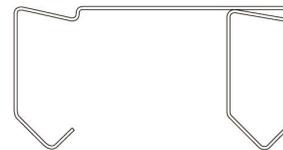

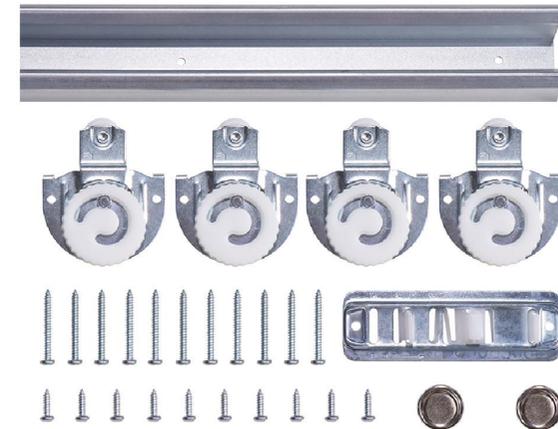

Silvex's pocket door is a space-saving treasure for home decor - it tucks into the wall, taking up absolutely no hallway space, so even small apartments or narrow corridors can still maintain ample room for movement. When retracted, the door remains completely hidden, leaving your space looking cleaner and more spacious.

SLIDING DOOR

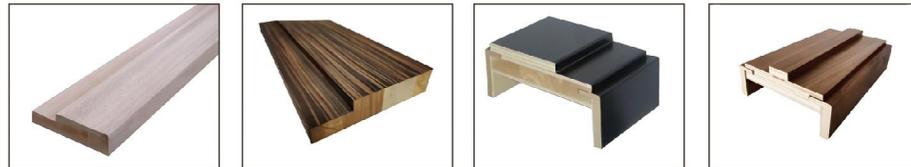

The Silvex sliding door features a clean, modern panel design that maximizes space efficiency. With smooth and quiet sliding operation, it is ideal for bedrooms, walk-in closets, and residential projects. This door system offers a practical and contemporary solution for modern interior applications.

DOOR FRAMES AND MOULDINGS

SilveX is supplying both completed doors and components like white primed and wood veneered door jambs and mouldings. We have different types of structures and materials for these jambs and moulding as below.

- Solid wood
- Engineered structure, with solid wood core, MDF or plywood faces, painted and wood veneered.
- Full plywood with painted or veneered.
- Full MDF with painted or veneered.
